Content / 10

- The physics concepts required to solve the problem are properly used and explained.
- The final result is correct.
- The significance of the final result is explained.

Written Presentation / 10

- Written copies of the solution on three-hole punched paper are provided.
- The solution is well organized, legible, and easy to follow.
- The problem is clearly stated at the start of the solution.
- Diagrams and sketches are used as appropriate to clarify the problem.
- The solution is detailed and all steps that are not obvious are fully explained.
- The final result is clearly indicated.

Oral Presentation / 10

- The problem and its solution are presented in a clear, correct, and concise manner.
- The presentation is brief (<= 5 minutes) and focuses on the main concepts.

Total / 30
